DEFENSE

m4  A.I. DRONE
GUARDIAN

On the battlefield for the first time, we see the massive use of small FPV drones (First Person View, quadcopter piloted with individual visors and remote controllers) attacking enemy troops on the ground, either directly or by firing anti-personnel grenades from above on the squads of soldiers below, causing many casualties.

This new scenario paves the way for the first time for the use of the 12-gauge shotgun in combination with 4/0 buckshot type ammunition, which create a large enough swarm at distances of 50m or more to easily shoot down the drone in close flight.

This is a 'last resort' defense that effectively saves the soldier's life and is not feasible with pistols or assault rifles.

**Now, with M4 A.I. Drone Guardian
we can achieve the goal.**

m4  A.I. DRONE
GUARDIAN

**M4 COMBAT PROVEN SHOTGUN,
UNMATCHED RELIABILITY IN ALL TERRAIN
AND WEATHER CONDITION.**

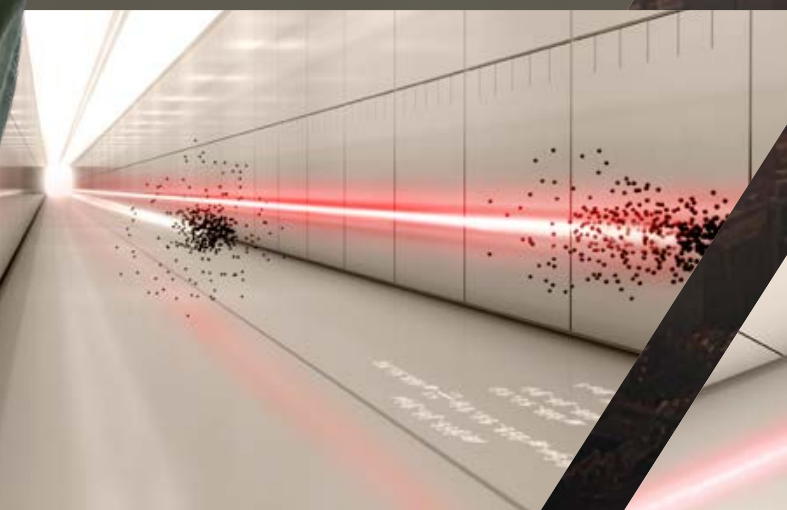

The aim is to have a "last resort" weapon against small quadcopter FPV Drones on the battlefield or to quickly defeat spy-drones, deploying it as a squad or firing team weapon or PDW for anti-drone of single operators on real battlefield.

"There's no second-place winner in a gun fight," is an old saying, but for those shouldering Defense and Law Enforcement responsibilities, this is more than just a saying—it's a way of life.

MORE SPEED

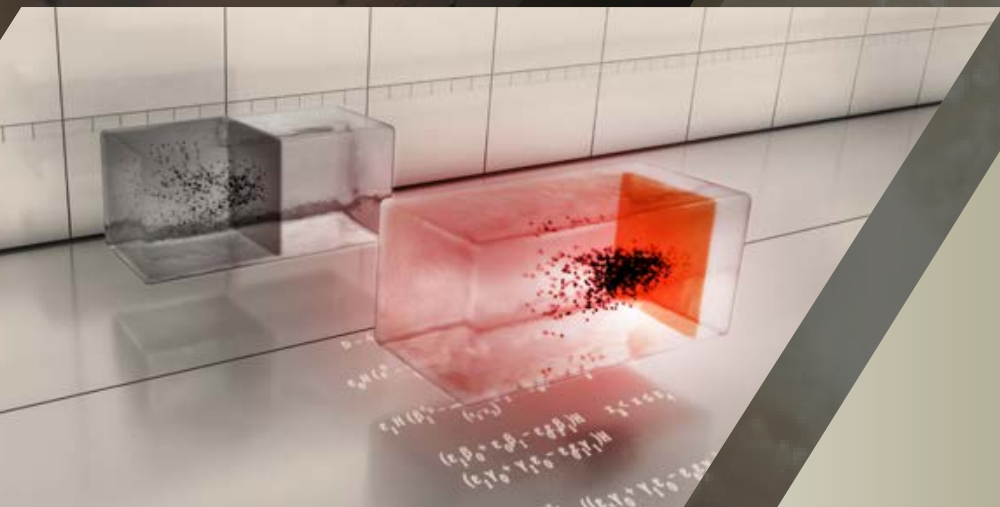

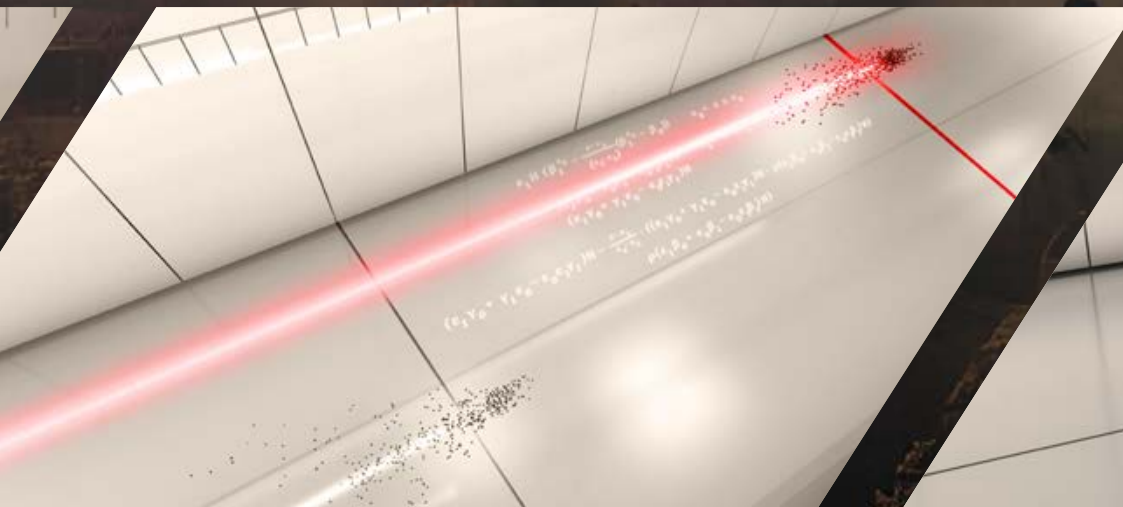

BENELLI ADVANCED IMPACT

A.I. stands for our proprietary technology Advanced Impact:

A patented system of larger and longer cone inside the barrel able to improve capability to hit targets at longer distance compared to standard shotguns and with a deeper penetration (and destruction capacity too) to engage targets from 0 to 50m (optimal) and till 100m or more (borderline shots).

LONGER DISTANCE

DEEPER PENETRATION

1 Stock

The telescoping buttstock 5-positions can be retracted for convenient portability or storage with new QD sling swivel systems

2 Pistol

The pistol grip is constructed of a tough synthetic polymer material for an absolute positive grip in wet or dry conditions

3 Receiver

The receiver is black anodized to prevent rust and corrosion under the most grueling conditions.

4 Bolt

The bolt is black phosphate and bolt locking head nickel-plated

5 Fore-end

The fore-end is a Multi-rail Handguard in aluminum with integrated and mounted ACCRO system and with weaver rails 5-slots that can be placed at 3/6/9/12 o' clock in different positions with new QD sling swivel systems and M-LOK system

6 A.R.G.O. SYSTEM

Patented self-cleaning, auto-regulating gas operating system

7 Sight

Red dot Holographic Sight co-witness with Ghost Ring Sights in fiber optic, Adjustable Rear/Fixed Front and Picatinny Rail

8 Magazine tube

The extended magazine will hold seven 2 3/4-inch shells or six 3-inch magnum shells + 1 in the chamber. Assembly and disassembly are quick and easy and can be accomplished without tools

9 Barrel

New Barrels phosphate with A.I. Technology 18.5" (for real battlefields) or 26" (to defend sensitive targets: bases, ministries, police stations, airports, malls etc.) and Cerakote finish

10 Chokes

Benelli Advanced Impact chokes are very special. 10 cm internal (M supplied), they have been redesigned according to the performance achieved on field.
